EMPLOYMENT

Gojek, Bengaluru (Remote)

Engineering Manager : Mobile – Driver Platform

May 2022 - Nov 2022

Managing the excellence pod of Android and iOS engineers at Driver platform building the driver apps for our driver partners. Focussed on people management, mentoring, hiring, prioritizing tasks, clarifying requirements, writing documentation, resolving blockers, coordinating with design, business, product, QA and backend to build features.

Worked on unifying the architectures of our Android and iOS apps, prototyping cross-platform mobile tech & introducing Kotlin multiplatform to the driver platform. Also managed the modularising of our existing Android app from a monolith, extracted out all the base functionalities and created scripts / tools to help other clusters do the same for their feature sets quickly.

Goto Financial, Bengaluru (Remote)

Engineering Manager : Mobile – Gopay

March 2021 - May 2022

Managing the user spend mobile pod of iOS and Android engineers at Gopay building promo and discoverability features. Worked with native Android and native iOS to build features on the gojek app. Worked with Flutter to build multiple systems from scratch like navigation, networking, analytics & server driven UI along with feature development for the gopay app.

Team Lead : Android – Gopay

June 2020 - February 2021

Led the development of features like Gopay Social, Jago bank integration & Order history under the consumer pod at Gopay.

Product Engineer : Android – Gopay

JAN 2020 - June 2020

Worked with the Gopay Android team on the Gojek consumer app on features like currency helper and Gopay social.
